

KODIAK AIRPORT

Contents:

- A Pavement Strength Form showing project history, latest Pavement Condition Index (PCI) data, pavement strength ratings (if available) and other useful information
- A Pavement Condition Survey – PCI Sample Unit Layout Plan
- PCI maps showing as-measured and predicted pavement conditions
- Age map showing pavement age as of January 2003
- A Branch PCI Condition Report
- A Section PCI Condition Report

Airport Information:

- Location:
Kodiak Airport is located near the east coast of Kodiak Island in the Gulf of Alaska. The City of Kodiak is located approximately 7 miles north of the airport, by road. The airport is used by the public, the U.S. Coast Guard, and the Air National Guard. Boeing 737 and C-130 traffic is common. Sometimes military larger jets have used the airport as well.
- District: Peninsula, Central Region
- Airport Manager: Robert M. Green
- District Maintenance Manager: Carl High
- Pavement Surface: Asphalt Concrete, Portland Cement Concrete
- Last Pavement Construction: 2000
- Pavement layout:
There are 3 Runways at the Kodiak airfield and numerous taxiways and aprons.
- Design Aircraft: B-727
- 2001 Enplanements: 62,768
- Airport Class: Primary
- Last pavement condition survey: 2002
- Next planned pavement condition survey: 2005
- 2002 reported pavement maintenance and/or changed conditions: No Report.
- Recommendations: See PCI maps
